GRAFFITI REMOVAL

HOW TO REMOVE GRAFFITI FROM A SLEEKFENCE™:

The good news is that with the right cleaning product, Graffiti can easily be removed from your SLEEKFENCE without damaging the finish. Many graffiti removal products out there are quite harsh and could damage even a heavy-duty powder-coated finish like ours. That's why we recommend using a product called "SENSITIVE SURFACE GRAFFITI REMOVER." You can purchase it using the QR code on page 2.

This cleaner we're using is designed for sensitive surfaces and will not damage the finish. It has a PH level of 7.8, which fits the approved range specified in the cleaning instructions. As you can see below, it is quite effective.

GRAFFITI REMOVAL

HOW TO USE THE RECOMMENDED PRODUCT TO REMOVE GRAFFITI:

1. Pour a small quantity of the remover into a small plastic bucket.
2. Choosing a small area of Graffiti, apply the remover to the Graffiti using a nylon brush.
3. Agitate the Graffiti with the brush as if you were writing with it. You can use a white soft scourer if suitable or if there is no risk of abrasion.
4. Wipe the dissolved Graffiti away by using a DAMP toweling cloth.

We also created a video that will show you exactly how to do this, scan the QR code below if you'd like to watch it.
